Profile

DevOps & Systems Engineer with 3+ years of progressive experience in enterprise networking, hybrid cloud infrastructure, and DevOps automation. Currently managing production-grade hybrid infrastructure at Cell Pay spanning VMware ESXi, multi-master MySQL HA, AWS cloud services, Fortigate firewalls in HA, and Kubernetes-based application delivery. Fortinet certified with experience across Cisco, Juniper, Sophos, and Ruijie environments.

Education

Bachelor in Computer Application (BCA)2020 – 2024
Thames International College, affiliated with Tribhuvan University, Kathmandu

- Graduated with GPA: 3.05

Intermediate (+2)
NIMS College, Kathmandu

Work Experience

DevOps & Systems Engineer May 2026 – Present
Cell Pay (Cellcom Pvt. Ltd.), Kathmandu

- Assumed full ownership of hybrid infrastructure — on-premise VMware ESXi and AWS cloud — managing production Linux servers running Nginx and Apache Tomcat
- Administered multi-master MySQL replication cluster, ensuring high availability, failover readiness, and query performance under production load
- Managed Fortigate firewalls in active-passive HA and Cisco switches, maintaining policies, VPN tunnels, VLAN segmentation, and WAN connectivity
- Provisioned and operated AWS services including EC2, VPC, RDS, S3, Route 53, and Elastic Load Balancing using Terraform for infrastructure-as-code
- Automated operational workflows using AWS Lambda and enforced application security through AWS WAF
- Built and maintained CI/CD pipelines with Docker and Kubernetes for containerised application deployments
- Operated unified observability stack — Zabbix, Prometheus, and Grafana — with proactive alerting for critical production events
- Administered Windows Server environments including IIS and MSSQL databases
- Managed Microsoft 365 tenancy and provided IT support for office systems

Junior DevOps Engineer April 2025 – May 2026
Ambition Guru, Kathmandu

- Built and maintained CI/CD pipelines using Jenkins and GitHub Actions to automate application deployments
- Monitored infrastructure performance using Zabbix, Grafana, and Prometheus with custom alerting
- Streamed and processed logs in real time using Apache Kafka for observability and analysis
- Deployed Wazuh EDR for endpoint security monitoring and threat detection
- Automated server tasks, backups, and scheduled jobs using Bash, Python, and Django Celery

Network Administrator April 2025 – May 2026

Ambition Guru College, Kathmandu

- Managed campus-wide LAN, WAN, and Wi-Fi networks ensuring uninterrupted academic operations
- Configured Sophos firewalls, VLAN segmentation, routing, and switch stacking for secure connectivity
- Performed capacity planning, vulnerability assessments, and security hardening across campus infrastructure
- Maintained network documentation, lab usage reports, and system inventories

Network Engineer November 2024 – March 2025
Neology Next Pvt. Ltd., Kathmandu

- Designed and deployed network backbones for banking and micro-finance institutions
- Implemented Fortinet, Juniper, Cisco, and Ruijie solutions for routing, switching, and security
- Executed device migrations with minimal downtime and provided L2/L3 remote troubleshooting

Senior Assistant — Network Operations Centre June 2023 – November 2024
WorldLink Communications, Kathmandu

- Monitored IPLC links, uplink bandwidth, and distribution circuits for enterprise clients
- Configured routers, switches, and firewalls and ensured SLA compliance through proactive monitoring
- Troubleshot mail and web server issues and tracked network device utilisation metrics

Additional Experience

SOC Analyst Intern March 2025 – April 2025
Vairav Tech, Kathmandu

- Monitored and analysed security events using SIEM tools and investigated malware threats
- Supported digital forensics, incident response, and vulnerability assessment activities

Service Project Chair2022 – 2024
Rotaract Club, Kathmandu

- Led community service projects and coordinated with the Rotary District Foundation
- Planned and executed social impact initiatives across education, health, and environment sectors

Projects

Automated Log Monitoring & Email Alert System Personal Project

- Built a Python-based pipeline to collect Syslog and firewall logs with automated email alerts, reducing manual review time

Tools: Python, Bash, Cron, Syslog, Iptables, Gmail SMTP

ELK Stack Centralised Logging Personal Project

- Deployed Elasticsearch, Logstash, and Kibana for real-time log aggregation and visualisation, reducing troubleshooting time

Tools: ELK Stack, Kali Linux, Logstash, Kibana, Syslog

Web Scraping & Reporting Pipeline Personal Project

- Developed a cron-based Python scraper to collect job listings and export automated Excel reports

Tools: Python, BeautifulSoup, Requests, Excel, Crontab, Gmail SMTP

Certifications and Training

- Fortinet Certified Associate — Cybersecurity (Fortinet)
- FortiGate 7.4 Operator (Fortinet)
- Network Support and Security (Cisco / NDG)
- NDG Linux Unhatched (Cisco Networking Academy)

- Windows Server 2022 (Microsoft)

Technical Skills

Cloud & Infrastructure: AWS (EC2, VPC, RDS, S3, Route 53, ELB, Lambda, WAF), Terraform, VMware ESXi, Windows Server, IIS, MSSQL

Networking: Fortigate HA, Cisco, Juniper, Sophos, Ruijie, VLAN, VPN, BGP, MPLS, WAN, TCP/IP, DNS, DHCP

DevOps: Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions), Bash, Python, Git, GitLab

Monitoring: Zabbix, Prometheus, Grafana, ELK Stack, Wazuh, Nagios, SolarWinds, Wireshark

Databases: MySQL HA, MSSQL, Apache Kafka, Django Celery

Languages: Nepali (Native), English (Fluent), Hindi (Fluent)
